

Here are some examples of PPI at different stages of the research cycle.

### **Identifying & Prioritising stage**

- Service users, carers and members of the public can help inform research priorities

### **Design stage**

- Help clarify the research question
- Co-design project
- Ensure the methodology is suitable
- Assist with a recruitment strategy

### **Undertaking/Management stage**

- Assist in collecting data & carrying out interviews
- Representation on project steering & governance groups

### **Analysing & Interpreting stage**

- Work with the research team to interpret data & develop themes

### **Dissemination stage**

- Share knowledge on where best to share the findings
- Present the findings
- Help write up dissemination materials

### **Implementation stage**

- Build relationships with knowledge users & policy makers through local user groups
- Assist in rolling out training plans
