## NEWS

### Nutrition and physical activities: How European Union contributes to public Health priorities including obesity?

15/11/2016

Investing in health promotion to keep people active for longer is investing in a better future

More than 20 pan-European actions have been co-financed under the 2nd and 3rd EU Health Programmes of the European Commission, with the aims to exchange best practices, to develop recommendations, and to improve standardized methods of data collection about nutrition and physical activity promotion.

From 30 November to 2 December 2016, in Budapest, the European Commission with the support of the Hungarian Ministry of the Human Capacities, has organised a very successful meeting to share these projects' results.

More than 30 projects were presented during this 3-day meeting.
