Figure 4.1 Summary of the service requirements of those registered on the NIDD, 2013

*'New service required' refers to a new type of therapeutic input that the individual does not currently receive.

†'Enhanced service required' refers to a change in the delivery of a therapeutic input that the individual currently receives. There are 7,896 individuals whose multidisciplinary support service change involves both a new service and an enhanced service, therefore the actual number of people requiring a new and/or enhanced service is $(15,792 + 11,487) - 7,896 = 19,383$.

Generic day services	0	1	1	64	125	59
All services	190	23	19	9,968	8,715	-1,485

Note: The data in relation to certain day services [1] are reported and interpreted on the assumption that:

- (a) where a service of this type already exists, it will be retained by the individual, even when another service is put in place, or
- (b) where a service of this type is new to the individual, it will not replace existing services.

[1] The services involved include home support services, early intervention team, resource or visiting teacher, home help, multidisciplinary support services, centre-based day respite service, and day respite in the home.
