

National Ability Supports
System (NASS)

**NASS Regional Bulletin
for CHO 6 - Wicklow,
Dun Laoghaire and
Dublin South East, 2023**

1 Background

This bulletin is based on validated data extracted from the National Ability Supports System (NASS) at the end of December 2023 for people who received their main service in Community Healthcare Organisation (CHO) area 6. NASS is a national database that records information about current Health Service Executive (HSE) funded disability services¹ and services required in the next five years. Disability services can be required as a result of an intellectual disability (ID); developmental delay, physical, sensory, neurological,² learning, and speech and/or language disabilities; or autism. Mental health is only recorded on NASS where an individual is in receipt of a HSE funded disability service.

The purpose of NASS is to gather information from service providers in order to aid the planning, development, and organisation of HSE funded disability services. A person is eligible to be registered on NASS if they receive or require (either currently or within the next five years) a HSE funded disability service as identified by their service provider.

There are some 18-year-olds who have moved to adult services while others remain in children's services until they finish secondary school. In this bulletin, 'children' includes service users aged 19 years³ and under who are engaging with children's disability services, and 'adults' refers to those engaging with adult disability services.

This bulletin presents an overview of the information recorded on NASS for people engaging with disability services in CHO 6. In total, 1,906 people are included in this bulletin, of which 108 are children and 1,798 are adults.

¹ 'HSE funded disability services' refers to the budget the HSE uses to fund services for people with disabilities. In 2023, the overall budget for disability services was €2.4 billion. See <https://www.gov.ie/en/press-release/59a35-minister-anne-rabbitte-announces-disability-services-budget-for-2023/>

² A neurological disability can include epilepsy, spina bifida, Alzheimer's disease, multiple sclerosis, acquired brain injury, and Parkinson's disease. This term applies to impairments of the nervous system.

³ There are a small number of people who remain in children's services past the age of 18, as they are still attending school.

1.1 Data collection

Information on NASS is captured under four headings:

- Service user details
- Primary carer details
- Disability type and diagnosis, and
- Services.

A primary disability should be recorded by the service provider for every person on NASS. There is also an option for reporting additional disability type(s). A primary disability refers to the disability which most restricts a person's ability to take part in daily life and/or the disability that gives rise to using/needing the most disability-funded services.

Within the Services heading, NASS captures 77 service options across six service types:

- Residential setting
- Day services
- Day respite
- Overnight respite
- Supports for daily living (for example, home support, a personal assistant, or community support), and
- Specialist supports/support services – including multidisciplinary services such as physiotherapy and occupational therapy and other specialised support services such as vision/aural rehabilitation services, assistive technology and animal-assisted therapy.

Service providers record information about current services funded through the HSE disability budget and services identified as being currently required or that will be required within the next five years.

1.2 Limitations of the data

It is important to note that information from the Children's Disability Network Teams (CDNTs) was not provided to NASS in 2023. This is due to the delayed rollout of the HSE's dedicated children's case management system (CDNT-IMS) for use by the CDNTs. This has resulted in a significant decrease in the number of children reported on NASS for 2023 compared to 2022. There were over 33,000 children who were engaged in CDNTs in 2022 that were not reviewed in 2023. It is hoped that NASS will have improved coverage of children accessing HSE funded disability services for 2024 as a result of a planned upload of data from CDNT-IMS to NASS by year end.

Information on day services received in 2023 reported to NASS were compared to the HSE, National Day Services Database (NDSD). Information on day services received in 2023 on NASS is lower than what was reported in the NDSD. Work is underway to identify service providers who are not on NASS and, service providers who are underreporting their data to NASS.

2 Children in CHO 6 on NASS in 2023

There were 108 children recorded in CHO 6 in 2023 as receiving either residential, respite, home support and/or specialised support services.

As mentioned in Section 1.2, NASS did not receive complete updated data from the CDNTs due to the delayed roll out of the CDNT-IMS. Therefore, we are unable to report on children attending CDNTs for multidisciplinary services.

3 Adults engaging with disability services in CHO 6

3.1 Number of adults on NASS in CHO 6 in 2023

There were 1,798 adults recorded as accessing or requiring a HSE funded disability service in CHO 6 in 2023.

3.2 Demographic profile

There were more males (987; 55%) engaging with services in CHO 6 compared with females (811; 45%). Table 1 shows the age and sex breakdown of adults registered in CHO 6.

Table 1 Number of adults in disability services in CHO 6 by age group and sex, 2023

Age groups	Male		Female		Total	
	n	%	n	%	n	%
18-24 years	185	10.3	87	4.8	272	15.1
25-39 years	294	16.4	219	12.2	513	28.5
40-59 years	342	19.0	315	17.5	657	36.5
60-69 years	112	6.2	119	6.6	231	12.8
≥ 70 years	54	3.0	71	3.9	125	7
Total	987	54.9	811	45.1	1,798	100

3.3 Occupational status

Information on occupational status was available for 98% (1,757) of the 1,798 adults accessing or requiring a HSE funded disability service in 2023, in CHO 6, of whom:

- Over one-in-three (35%; 614) were in a training or day programme.
- One-in-four (25%; 443) were unable to work due to a disability.
- One-in-five (20%; 353;) were in paid employment.
- Nearly one-in-ten (9%; 162) were unemployed.
- Six-percent (102) were retired.
- The remaining 5% were students (3%; 57), engaged in home duties (1%; 18), or had 'other occupational status' recorded (1%, 8).

3.4 Living arrangements

Information on living arrangements was available for 98% (1,765) of the 1,798 adults accessing or requiring HSE funded disability services in CHO 6, of whom:

- Over one-half (58%; 1,017) were residing with family members.
- One-quarter (25%; 443) were living in a residential service setting.
- Fourteen-percent (252) were living alone.
- The remaining 3% (53) were living with non-relatives.

3.5 Reported disabilities

The most frequently reported disability among adults in CHO 6 was ID (1,090; 61%), followed by visual disability (377; 21%), and neurological disability (184; 10%) (Table 2).

Table 2 Primary disability among adults in CHO 6 on NASS by sex, 2023

Primary disability	Male		Female		Total	
	n	%	n	%	n	%
Intellectual	601	55.1	489	44.9	1,090	60.7
Visual	167	44.3	210	55.7	377	21.0
Neurological	148	80.4	36	19.6	184	10.2
Mental health	47	53.4	41	46.6	88	4.9
Speech and/or language	9	47.4	10	52.6	19	1.1
Developmental delay (under 10 years only)	6	33.3	12	66.7	18	1.0
Hearing loss/deafness	7	63.6	~	36.4	11	0.6
Specific learning difficulty (other than intellectual)	~	20.0	~	80.0	5	0.3
DeafBlind-dual sensory	0	0	~	100	~	0.1
Autism	0	0	~	100	~	0.1
Not verified*	~	~	~	~	~	~
Total	987	54.9	810	45.1	1,797	100.0

~ In order to protect against the risk of indirect identification of individuals, values less than 5, or where individuals may be identified, have been suppressed.

* Not verified - Where the type of disability has not been verified for an individual by an appropriate healthcare professional.

3.6 Additional disabilities

A total of 714 adults had at least one additional disability along with their primary disability recorded. The most commonly reported additional disability was physical disability (219), followed by intellectual disability (158), and speech and/or language disability (146).

3.7 Primary carer

Of adults registered on NASS who do not live in a residential setting (1,355; 75%), six-in-ten (63%; 856) reported having a primary carer; almost all of these individuals live with their primary carer (90%; 768).

The majority (82%; 705) of primary carers were parents, 8% (67) were siblings, 6% (47) were a wife/husband/partner, and 3% (21) were a non-relative. The remaining 1% were either a daughter/son, foster parent or other relative (16).

Age was recorded for 77% (656) of primary carers; 34% (295) of whom were aged 60 years and over.

4 Services

This section reports on the HSE funded disability services people with disabilities use and/or will require in the next five years, as reported by their service providers, in the following categories:

- Residential and assisted living services
- Day services
- Day and overnight respite, and
- Support services (including multidisciplinary, and specialised support services).

The information presented in this section represents whether a service was recorded as:

- **Current services:** The number of places accessed in the reporting year.
- **Enhancement required to current services:** The number of places accessed which require an enhancement in the next 12 months; for example, additional hours/days or additional support.
- **New services required:** The number of new places required for those not in receipt of that service but who require it now or will require it within the next five years.

Information on residential services, assisted living services and, respite (day and overnight) services is presented for the full cohort of people. Information on support services for children is incomplete; therefore, these data are only presented for adults.

Individuals may access one or more services within our broad categories of services outlined e.g. a person can access both centre based overnight respite and holiday overnight respite over the calendar year.

4.1 Current service provision

The following outlines 2023 data for current service provision in CHO 6.

- A total of 430 people were recorded as living in a residential setting in CHO 6.
 - The majority (424) were adults.
 - A house in the community with four or fewer residents was the most commonly accessed residential service (225), followed by a community group home with between five and nine residents (142).
 - Of the 430 people living in a residential setting, 13% (54) require an enhancement to their current service.
- A total of 395 people were in receipt of 407 assisted living services. Assisted living services include services captured on NASS as home support, and personal assistant.
 - Of these, 42 were children and 353 were adults.
 - Of the 407 assisted living services, 350 were home support and 57 were personal assistant services.
 - A total of 7% (27) of assisted living services require an enhancement.
- A total of 1,174 adults accessed at least one day service.
 - A day programme was the most commonly accessed (1,091; 93%) type of day service.
 - Rehabilitative training was received by 90 adults.
 - Of the 1,174 adults accessing a day service, 12% (141) require an enhancement to their current service.
- Overall, 38 people accessed day respite places in CHO 6.
 - All were centre-based respite.

- A total of 133 people accessed 134 overnight respite places.
 - Of these, 65 were children and 68 were adults.
 - The most commonly accessed type of overnight respite was a house in the community or a dedicated respite centre (126).
 - A total of 4,442 nights of overnight respite were received.
 - Of the 133 people accessing overnight respite, 24% (32) require an enhancement to their current service.
- 1,139 adults received one or more support services from either a multidisciplinary team or a specialised disability service in 2023.
 - Overall, 3,184 support services were accessed during 2023.
 - A key worker was accessed by 948 people.
 - The most commonly accessed support services were social worker (320), and psychology (269).
 - Of the 3,184 support services accessed, 6% (191) required an enhancement.

4.2 New services required for 2023–2028

As outlined in Section 1, NASS collects information on the HSE funded disability services that people with disabilities currently use and/or will require in the next five years. New services required are the number of new places that service providers have identified as being required by people who are not yet in receipt of a particular type of service but who need it now or will need it within the next five years.

The following outlines data regarding new services required for 2023-2028, as identified by service providers in CHO 6.

- A total of 310 people were identified by service providers as requiring a residential service.
 - All were adults.
 - Of the residential services required, 97% (302) are for a place in a house in the community with four or fewer residents.
 - Of the residential services required, 69% (215) are required immediately i.e. required in 2023; and 8% (27) are required in 2024.
- Service providers identified 57 people as requiring 59 assisted living services.
 - Almost all were adults.
 - Overall, 44 of these services required were for home support and 15 were for personal assistant services.
- There are 216 people requiring a day service in 2024⁴.
 - A day programme is required by 146 people, and rehabilitative training is required by 70 people.
- Overall, 160 people require overnight respite.
 - Of these, 152 were adults.
 - Overnight respite in a house in the community or a dedicated respite centre is the most commonly required (103).
- Overall, 327 adults require at least one support service from either a multidisciplinary team or a specialised disability service.
 - The support services most commonly required are occupational therapy (126), physiotherapy (117), and counselling psychology (57).

⁴ Information on day services required in 2024 was provided for this bulletin by the HSE National Day Service Database (NDSD).

5 Publications and analysis

This bulletin provides an overview of data from NASS about people who received their main service in Community Healthcare Organisation (CHO) area 6. This bulletin should be read in conjunction with the main NASS bulletin 'Overview of people engaging with disability services, 2023'. Additional supplementary bulletins presenting information on people with an intellectual disability, physical or sensory disabilities, and by each CHO area are available on the Health Research Board (HRB) website <https://www.hrb.ie/data-collections-evidence/disability-service-use-and-need/publications/>.

Requests for further analysis with more detailed or different breakdowns are welcomed. Please visit <https://www.hrb.ie/data-collections-evidence/disability-service-use-and-need/request-data/> to access a data request form and return it to nass@hrb.ie.
